

# LaGrange County RC Club

## May10 Business Newsletter

Meeting was opened and minutes and treasurers report approved. Eight members present.

**New Business:** Jerry is to buy a bag of wire ties for the barricades. It was voted and approved to give Tommy the old mower and snow blower attachment. The mowing was discussed and the procedure reviewed. Mowing with the rider will require filling the tank with regular gas after mowing. Each person mowing is to provide the gas for the tractor and push mower. The weedeater has a gallon of mixed fuel and should last the season. Replacement string is in the building. Check the oil on the tractor and push mower before use. There is a two gallon can of gas in case you forget to bring some. It should be refilled if used. It is recommended to not mow alone. Have a flying friend to help and return the favor. At the very least have a cell phone. September 11 has been selected for a multi-club fly in. Details to be worked out as we get closer to the date.

**Old Business:** None

**Editors Comments:** The rider mower will climb the entrance to the pond. The path should be opened up as needed for the boats and float planes.
